

We expand our team

Position: Plant Certification Engineer

Location: Derby, England, United Kingdom (Hybrid)

Salary: Competitive basic, with excellent company benefits including competitive pension scheme and private healthcare.

AEGIS Certification Services Ltd is a dynamic and growing independent certification company. Our vision is to be recognised and respected globally as the rail certification body of choice – a positive choice for our staff as well as our clients. We are proud to offer employees an inspiring combination of a stimulating environment at the cutting edge of the railway arena, a supportive and encouraging working culture where work/life balance is a key element, and the opportunity to develop their skills and experience with one of the fastest growing certification consultancies in the industry.

The Role

You will mainly be working on Plant Assessment Body (PAB) and Independent Competent Person (ICP) Plant Certification projects. These projects are primarily On Track Plant and On Track Machines. You may also be required to work on other certification projects.

Essential Skills/Knowledge:

The following attributes are considered essential for the role.

- Ability to accurately follow defined procedures.
- Understanding of the principles of compliance.
- Understanding of the principles of mechanical and/or electrical engineering.
- A structured approach to completing tasks.
- Ability to demonstrate continued professional development.
- Understanding of the principles of engineering risk management.
- Full UK drivers' licence.

Desirable Skills/Knowledge:

The following attributes are considered desirable for the role.

- Degree in Mechanical or Electrical engineering.
- Ability to manage clients within a range of circumstances.
- Experience of compliance management.
- Experience of plant engineering.
- Experience of railway engineering.
- Experience of European standards.
- Understanding of the legislative requirements for placing products onto the market.
- Registered with a professional institution licensed by the Engineering Council.

An AEGIS Engineer is one who combines excellent technical skills with a commitment to deliver first class service to our clients, whilst living the values and culture of the business – conscientiousness, respect, integrity, excellence, and fun.
